

Praxis Dr. Andersson, Köln

{titleflag:de}

"....after a very short period of vocational adjustment Rendoscopy becomes a very powerful tool! As well complex findings can be visualized very quick and can be visualized and documented in a brilliant quality"

"Rendoscopy fits seamless into our clinical busy infrastructure and enables us for a high efficient work-flow for reading, assessment and documentation of virtual colonoscopy exams. The highly intuitive and consequent logically creation of the Graphical User Interface (GUI) enables us, that after a very short period of vocational adjustment Gentle Colon becomes a very powerful tool! As well complex findings can be visualized very quick and can be visualized and documented in a brilliant quality."

Mrs Dr. Andersson
